Designed and Made in India

NOW YOU CAN USE YOUR MOBILE AS A GUARD TRACKING DEVICE

How it works

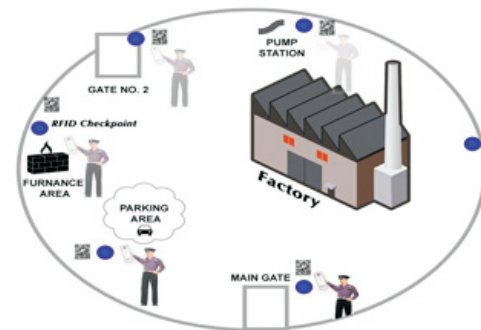

Step 1

Assign a Guard device to a guard

Step 2

Allocation of route to the guards and download data after guard patrol

Main Gate --> Parking area --> Furnance area --> Gate No. 2 --> Pump Station --> Main Gate

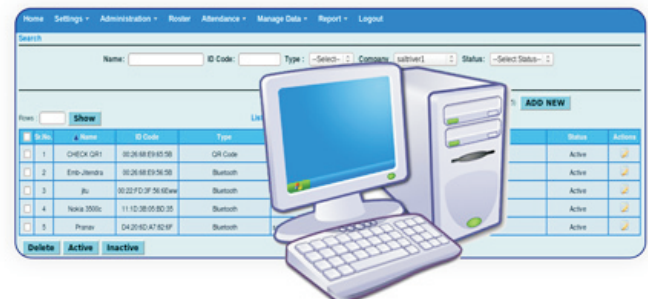

Step 3

Realtime tracking of the guard on Barcode/Bluetooth based tracking

Step 4

Generate complete analytics report of the guards and verify missing checkpoints individually in a complete web based software

Features

- Every requirement from security to simplicity.
- Gather Data in real time from remote sites.
- Low cost and very economical.
- Designed and made in india.
- Extreme resistance and reliability
- Ideal solution for those who looking for the tracking of security
- Can allow realtime tracking using GPRS/SMS
- Generate complete guard analytics reports
- Can work on any camera based java enabled phones

Applications

- Security Guard patrolling
- Building guard patrolling
- Time & attendance monitoring
- Military patrolling
- Policeman patrolling
- Remote equipment inspections and maintenance
- Goods delivery, transportation management
