

# ENVO-MONITOR

## Envo-Monitor helps you to :

- Monitor threshold levels for temperature & humidity
- Temperature monitoring
- Humidity monitoring
- Sense and create data log for system failures
- Alarm acknowledgement
- Generate alert when changes in the Upper Limit and Lower Limit of temperature or humidity

## Application Areas :

Server Room monitoring  
Fire Alarm System  
Server Room Surveillance and Monitoring Control  
Heating, Lighting & Climate Control  
Data Monitoring and Equipment Control  
Security System  
Blood Banks  
Cold Storage

Warehouses    Production Areas    Cold Storage

## Features :

Work as Data Logger  
 Generate alarm when temperature or humidity crosses the range  
 Alarm acknowledgement  
 Can interface hooter or LED lamp for alarm notification  
 Builtin temperature and humidity sensor

## Specifications :

Digital Output Ports:	4-RelayOutputs, ~240V,5A,terminal Blocks
Digital Input Ports:	Digital Input Ports: 8-Digital Inputs-Electrically isolated. "0" -(false) 0-1 V, "1" -(true) 1-12 V, Terminal blocks.
LED indication:	Relay output, Power.
Power Supply:	Wide DC Input Voltage Range (12 to 24V DC, 3A)
Relative Humidity:	10%-90% RH
Temperature:	0 to 99.99 C (upto 3 channels)
Display:	20 char x 4 lines high contrast back light LCD display
Dimension:	430mm(L) x 400mm(W) x 120mm(H)
Enclosure:	Metal/ABS
Operational temperature range:	-10 °C to 60 °C

## Other Models :

- Envo-Monitor GSM
- Envo-Monitor Net+GSM
- Envo-Monitor Serial
