

CellApps Client – Quick reference guide

We offer CellApps client to send bulk SMS as it has more facilities. You can download CellApps Client from download section of our site www.saltriver.com. Install the cellapps lite setup downloaded.

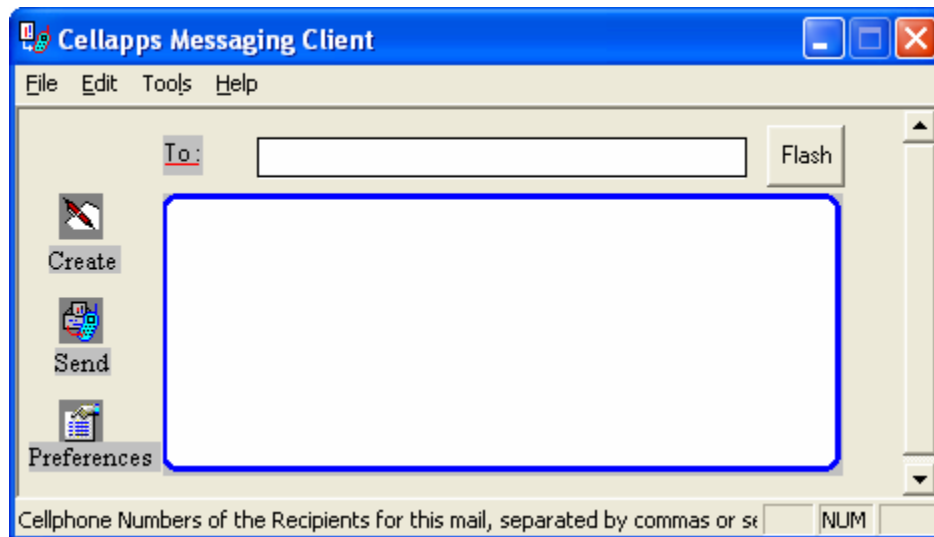

At start menu you will find the short cut CellApps Client 2.0.

Open the CellApps clients and enter the **Username** as **guest** and **Password** as **guest**, as it is default user. You can create User form [Multicast User Management](#) only if you are logged in as Admin in CellApps-Lite. Open Database option in CellApps consol screen then select multicast user management and Press **New** button to create user. Enter that user here.

A dialog box titled 'User Authentication Required' with a red 'X' icon in the top right corner. It contains two input fields: 'User Name : ' and 'Password : '. To the right of the 'User Name' field is an 'OK' button, and to the right of the 'Password' field is a 'Cancel' button.

Once you enter the CellApps client you will fine the window below. Enter the Numbers and Press send and SMS will send.

CellApps Client has option like Preferences and Address book which are very helpful:
[Preferences](#)
[Address book](#)

Preferences

- To open the preferences, click on Edit menu or press CTR+P. It will ask you password as only admin in CellApps-Lite can use this option in CellApps Client.
- Enter the password as **admin** then you can open this option.

- You can edit the user here. Press Update to save the changes. You can also change the Password. Press **Change Pass** button.

Address Book

- To open the address book just click on Tools in CellApps client or CRT+B
- Fill the information and Save the address book.
- Now you can use **Select All** option form address book and send sms to all members of your address book at once.
