Installing CellGuard on your mobile.....	2
Set Password	3
Configure SIM.....	4
Set the Mobile number to which a message to be sent in case of unauthorized SIM card changes.5
Reset Password.....	6
Registration.....	7

Installing CellGuard on your mobile

Follow the steps below to install Cell Guard in your mobile to start using CellGuard.

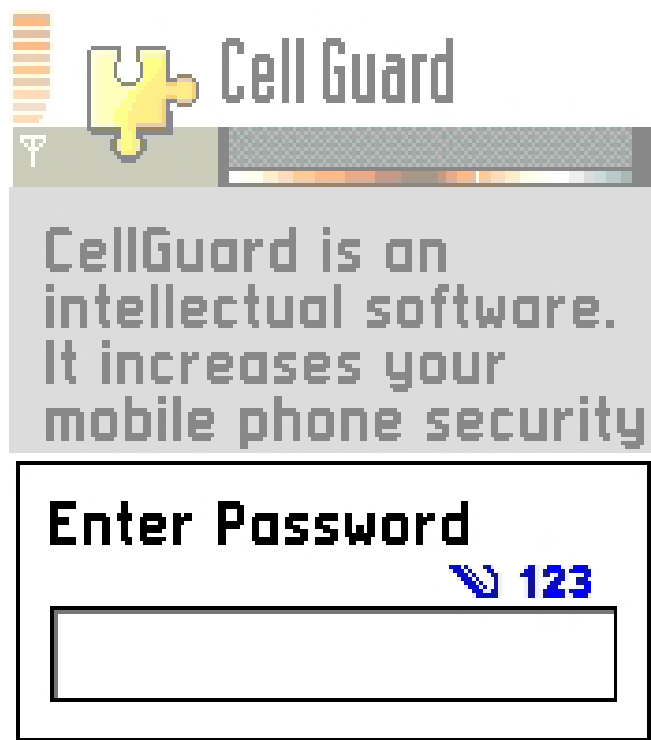

Once you download the software to your computer, your computer will have a file named CellGuard_S60_1st. SIS

Connect your Mobile to the computer through Bluetooth, Data Cable etc...and transfer this file to your mobile.

Note: Make sure to save CellGuard on your Mobile phone's Memory. As the protection is to be done even if the SIM card of your mobile will be changed.

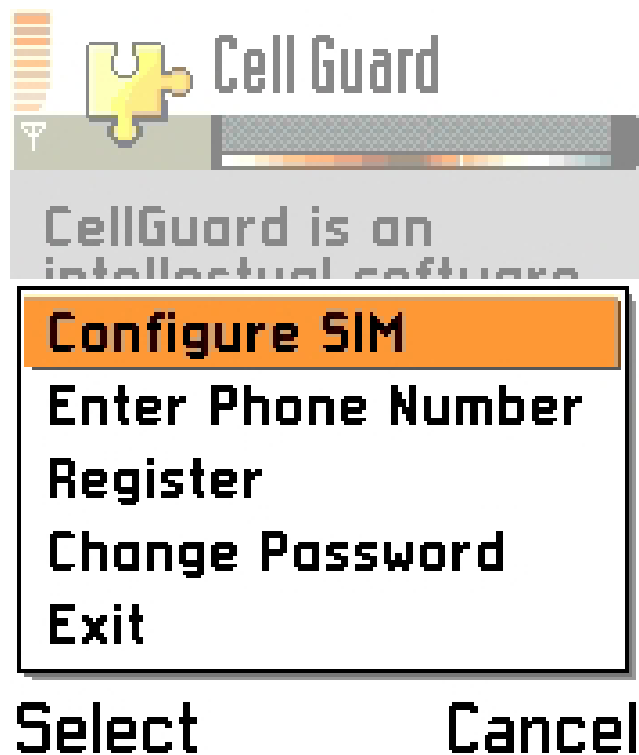

Set Password

When you open the CellGuard application first time from your mobile, the system will ask you a password. You need to set and remember this password, as without this password you will not be able to make any settings, even when we need to change the SIM card we need this password and it is important to remember the password.

Configure SIM

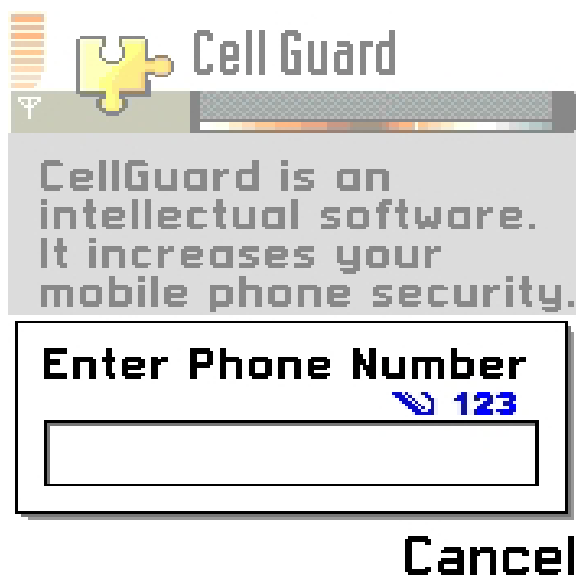

You have to configure your SIM once only; once your SIM is configured your phone is secured. This is done by selecting Configure SIM option from option menu of CellGuard.

Set the Mobile number to which a message to be sent in case of unauthorized SIM card inserted.

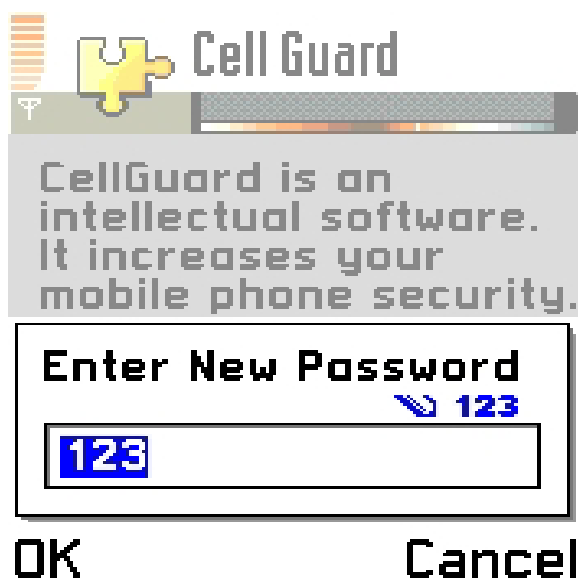

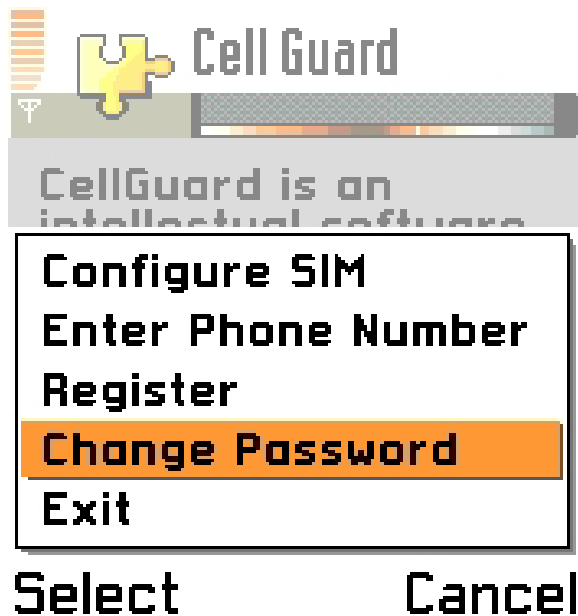

Select the Enter Phone Number Option from the CellGuard Menu options available to set the mobile number as shown in the images below.

A message will be sent to this mobile number with the location and SIM details of the newly inserted SIM card in case someone tries to change the SIM card after the phone is lost or stolen.

Change Password

You can change the password. By selecting the option Change Password from the CellGuard Menu options available

Registration

You can use CellGuard free for 5 days once it is downloaded to your mobile. After that you need to register the application to continue using the CellGuard.

To register follow the steps below:

1. Start the Cell-Guard application in your mobile.
2. Enter your password
3. Select the registration option
4. Note your site Key as given
5. Contact the vendor and convey your Site key to him
6. Once you get the Key from your vendor enter it in the Key field and Press Ok
7. Now you are ready to use the CellGuard full version.
