

# Quick Reference Manual

## Location Tracker – Windows Mobile edition

The Location Tracker- Mobile edition allows you to track the mobile in which the location tracker software is installed. Thus it can be used for tracking Field Force (Sales Persons, Doctors etc.), Vehicles, and Mobile Assets.

It's a low cost and efficient way of tracking. You can use Location Tracker- Mobile edition with any Windows mobile phone based on Windows Mobile 5.0 + OS.

Location Tracker- Mobile edition is based on Cellid or inbuilt GPS technology.

Location Tracker- Windows Mobile edition offers Online Location Monitoring facility:

Online mode: which sends location data to a fixed number at regular interval.

Location Tracker- Mobile edition also offers Web Interface to monitor multiple users.

You can use Mobile edition of Location Tracker right away by spending some time going through the following easy steps.

## ***Installation Guide***

Follow the steps below to install Location Tracker in your Windows mobile.

Once you download the software to your computer, your computer will have a file named **LtrackerSetup.Cab**

Connect your Mobile to the computer through Bluetooth, Irda or Data cable and transfer this file to your mobile.

## ***Registration process***

Once you find location tracker under your phone's programs menu, you are ready to start using it by following the simple steps defined below.

Note: If you would like to try Location Tracker- Mobile edition before Registering for it, you can use it free for 3days after installing it in your mobile.

Once the trial period is expired, use your Scratch card and Site Key to get the Registration Key from the Vendor to continue using Location Tracker- Mobile edition.

Go to Options → Register → Manual

Please note that you must ***restart*** your phone after successful registering your location tracker.

## ***Set New Password for the first time***

When you start Location Tracker in your mobile first time it is important to set the Password, as system will ask password for other times login. Press Location Tracker symbol in your mobile and you will see the application and system will ask you to set the Initial password. Enter valid password and Press OK to confirm the password or press cancel to exit the application.

Once you set the password, now set the mobile number on which you would like to receive the Tracking report SMS to monitor the location details online. Also set the time interval on which interval you would like to receive the Tracking SMS.

## ***Set Recipient phone number***

Set the phone number on which you want to send the Tracking report SMS.

## ***Set Timer Interval***

Set the timer interval to the time period you want to send the data on.

## Other Settings

### Track mode :

The location tracker works on two types of tracking mode.

1. CBM – This is Cellid based tracking
2. GPS – This is Internal GPS based tracking ( To enable this your phone must have inbuilt GPS)

*Sending Options :*

Location Tracker offers two options for the data sending...

1. SMS: The application will send the positioning data via SMS to predefined recipient number.
2. GPRS: The application will send the positioning data via GPRS (Internet) to the location tracker server. For this your phone must have GPRS activated.

*Timer :*

You can start/stop the timer using this.

If the timer is started then only the system will send the data as per desired timer interval.

*Device Number :*

If you want to send the data on Location tracker server ([www.locationtracker.com](http://www.locationtracker.com)) via GPRS then you need to set your device phone's number here. The location tracker server needs device identity so to identify this device the number set here will be sent to server along with other details using GPRS.

*Save Settings:*

After completing your change to affect these changes, you need to save the settings. So must select the Options → Save Settings after completing your all changes.

*Change Password :*  
To Change the password.

## Web Interface to monitor multiple users

You can track multiple mobile/ users with Location Tracker- Mobile edition.

All mobiles / users sms reports are been received to CellApps sms server and all reports then transferred to the location tracker database by CellApps.

In web site click on Customer's Login and enter your company name and password, which is provided by Saltriver at the time of registration.
