

How do I maintain all my passwords ?

**Solution Is Password Manager**

Maintain Your Passwords on USB Drive

**Password Manager** is a utility which allows us to keep track of our web account password on a USB drive or on a Hard Disk in encrypted manner so that you can simply login by just clicking on the account Details.

Do you use same key for all safes ?

Think ???

*Why is that you use same password on all website?*

# Do not keep your Passwords Simple and Same !

**Warning :** An unhappy employee, a curious family member, or a network hacker can easily find one of your password and crack all of your web sites.

**PC Version**

This version is a PC based application where the user can access web accounts from the PC from which the password manager is installed.

**Pen Drive Version**

This version will be helpful to store the passwords on a flash drive and the accounts can be accessed from wherever the user goes through the flash drive.

Your secretary can check web account without you revealing password

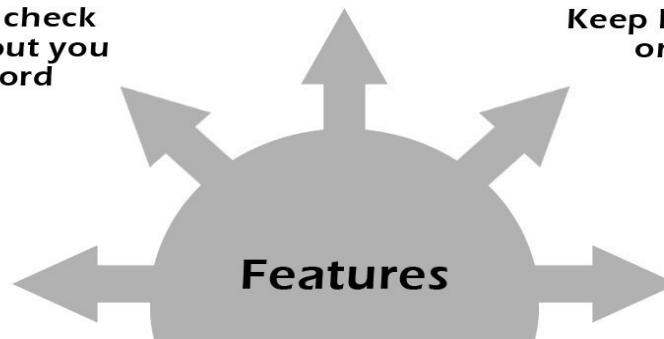

Carry your Password wherever you go

Keep Backup of Passwords on any FLash drive

No worry to lose password

Single Click Login to Website Accounts using Password Tracker
