Wireless Bill Board is LED billboard with facility of changing display message using SMS or wireless card. It is very use full marketing, advertising or display information method. You can change display text anytime. It is low cost & very handy product. Easy to configure and no maintenance required.

Retail stores can promote sales or tell customers to visit the company website after-hours. Restaurants can inform guests about the specials of the day. Use it as a motivational tool for the office by displaying the employee of the week or month. Let people know about upcoming meetings. Use it to display flight timing or delay at Airport or at Bus stand or at Train station. Use it to display currency or gold/silver rate change at Banks or any jewelry shop.

Features

- ▶ Program text to scroll, blink or remain stationary.
- ▶ Change the text message any time remotely using SMS or Wireless card in no time.
- ▶ Use for business promotions, parties, display currency rate in bank, display airline timing on airport or special events.
- ▶ Built-in keyboard displays full alphabet, numbers.
- ▶ Can be powered with standard AC adaptor.

Product is available in following two editions :

- (1) Change the message using SMS (configure mobile number/s or predefine character for authentication).
- (2) If the billboard is in WiFi area e.g. Air port then using the inbuilt wireless card in billboard system you can change display text.
- (3) Data can be changed using serial or TCP/IP interface also.
