

Em@il Reader

Em@il Reader

Read e-mails from anywhere

EmailReader software allows you to read or reply to e-mails from any touch tone phone!

Em@il Reader

Read e-mails from anywhere

Features

Features

- Listen to your e-mails in Voice from any touch tone phone
- Reply to any Email in Voice form
- Works with any POP3 mail server
- Automatically converts Email text in Voice format
- Allows adjustment of speech quality and other parameters
- Supports TAPI compliant Voice Processing Boards, Dialogic and Voice Modems

How it Works

How it Works

1. Dial to the e-mail reader Server
2. Authenticate with your Digital User ID and Password
3. After the welcome greeting, the system would inform you number of new messages in your mailbox
4. You can choose option 1 to sequentially read these messages or 2 to go to specific message
5. You can choose 1 to go to next message, 2 to read the message, 3 to repeat it, 4 to delete it and 5 to reply to the message
6. If you select option 5, you can just speak out and end message by dialing 1, thus message would go as a multimedia file to the sender
7. Once done, you can quit by dialing 0
