- ✓ SEND/RECEIVE EMAILS FROM ANY WINDOWS/DOS MACHINE
- ✓ AUTOMATICALLY DISTRIBUTE MAILS FROM ONE CATCH ALL ACCOUNT
- ✓ ACCESS CONTROL FACILITY

Product Overview:

UMSLite is a easy to use POP3/SMTP complaint mail server for any organisations internal and external mailing needs. It can run on any Windows 32 bit operating system and takes only few minutes to setup the mailing system in your organization. UMSLite is built using the input from various Network Administrators and incorporates features like Virus Scanning, Automatic Scheduling, Multiple Mail Box Mapping, Web Mail integration which not only improves network performance but would also improve productivity at your work place as people would not be busy looking for their e-mails in multiple account regularly. Unlike other solutions, UMSLite has been designed to keep low Total Ownership Cost.

How it works:

POP3/SMTP MAIL SERVER

1. RFC compliant
2. Can use outlook or any other standard mail client
3. Supports Authenticated SMTP for sending external mails
4. Includes a smart SMTP server

3

UNIFIED MAILBOX

Collects mail from multiple POP box automatically

MAIL DISTRIBUTION SOFTWARE

Automatically distributes mails to individual users the name in To or CC field

INTERNET ENABLE YOUR LOCAL MAIL SERVER

Can access (read/write) office mail server anywhere using Internet from a browser

FACILITY TO VIRUS SCAN ALL MAIL ON SERVER

Norton or Macfee antivirus specific versions can be configured with UMS for virus scanning on mail server
